

Two zones. One artifact. The share button knows the difference.

The Recap is two artifacts in one frame. Above the rule: the diagnostic dashboard a parent opens to answer *did the week hold together?* — pace, hours, completion, carryforwards. For her eyes only. Hours and percentages do not survive contact with audiences trained on seat time. They never share.

Below the rule: the artifact she shares. Hero, Story, mastery shifts as concept-language accomplishments, voice line. The share gesture captures this zone only — not by the parent's discipline, but by architecture. There is no version of the share that includes the hours number, because the share button cannot reach above the rule.

01 THE RECAP · DIAGNOSTIC ZONE ABOVE, SHARE ZONE BELOW · phone viewport · 390px · the architectural rule between zones is the load-bearing decision

THE PLANTHE RECAPTHE RECORD

WEEK 14
MAR 30 — APR 3 · THE OGUNTALAS

FOR YOU

14 hours30minutes

On pace. Year-to-date: 421 hours of 900.

HOURLY BY SUBJECT

SCIENCE	4h 38m	MATH	3h 12m
LANG ARTS	2h 54m	GED & HIST	2h 02m
CREATIVE	1h 08m	PE	36m

Blocks completed24 of 28

CARRIES FORWARD TO NEXT WEEK

D

Friday's **history** block — bridges of ancient Rome

L

Thursday's **math** review

M

Wednesday's **creative** block

J

Tuesday's **PE** block — went outside instead

THE WEEK

SHAREABLE

Six bridges. One collapsed.

THE STORY

The bridges held all week except Tuesday's. **Jack** figured out triangulation by Wednesday and rebuilt the failed one twice as long.

Leo and **Max** spent most of the week in **science**; the popsicle-stick beams are still on the kitchen table.

WHAT LANDED

J

Triangulation
HALFWAY → FULL

L

Multi-digit multiplication
NONE → HALFWAY

D

Bridge engineering
FIRST ENCOUNTER

The day is made.

WII-00

What lives where, and why.

FOR YOU

Pace status: total hours, hours by subject, blocks completed, carryforwards by name. Diagnostic. Invites comparison to seat-time when read by audiences trained on traditional school. Cannot share.

SHAREABLE

Hero photograph, Story prose, mastery shifts as concept-language accomplishments, voice line. Expressed in subject-matter language, not metric language. Reads correctly to any audience. Default share.

DISCIPLINE

The share button cannot reach the For You zone. Not gated, not hidden — architecturally outside the share gesture's scope. The parent never has to remember what's safe to share.

Why mastery shifts share but hours don't: A grandparent reads **Jack** — triangulation, halfway to full and thinks my grandson learned a real geometry concept. A grandparent reads 14 hours this week and thinks that's only three hours a day, is that enough? Same week, two readings, depending entirely on whether the artifact uses subject-matter language or metric language. The share zone uses subject-matter language by design.

The architectural rule. A 1px line in the deeper warm tone (#D8CFB8) with a 40px saffron accent at center. Quiet but visible. The parent reads it as a fold — above is hers, below is what the artifact tells the world. The eyebrow on each zone (FOR YOU / Private / THE WEEK / Shareable) reinforces what the rule means without explaining it. Two visual cues, one architectural decision.

What the share button captures.

02 SHARE · PREVIEW · HERO · STORY · MASTERY SHIFTS · VOICE LINE · no hours · no completion · no carryforwards · architecturally unreachable

WEEK 14 · MAR 30 — APR 3 · THE OGUNTALAS

NONE → HALFWAY

The day is made.

WII-00

What goes to grandma. The full emotional artifact: photograph, voice line, Story prose, mastery shifts as concept-language accomplishments, the closing voice signature. No hours number. No completion ratio. No carryforwards. Nothing that invites the seat-time comparison.

The mastery shifts are the diagnostic substance that survives sharing. They tell the recipient what was actually learned in subject-matter terms — triangulation, multi-digit multiplication — rather than in time terms. A reader who has never homeschooled reads these and understands the work was real. The same reader looking at 14 hours would compare it to a school day and conclude the opposite.

Architecturally: the share button captures everything between the architectural rule and the closing voice line. The For You zone above the rule is unreachable from the share gesture. The parent doesn't choose what to share — the artifact has already chosen for her.

The print keepsake — share zone only on paper.

03 PRINT · RECAP — 8.5 × 11 · PORTRAIT · SHARE-ZONE-ONLY · print is inherently shared · same architecture, different medium

Print is inherently shared. The moment a parent prints a Recap, it can be left on a counter, mailed to a grandparent, or saved in a binder seen by anyone who walks through the home. The same architectural logic that protects the screen share applies to the print: the print captures the share zone only.

What's missing from the print, by design: total hours, hours-by-subject bar, completion ratio, carryforwards. None of these belong on paper a third party may see.

What earned its place: Hero photograph, voice line, Story prose, mastery shifts as concept-language accomplishments, closing signature. The keepsake artifact, on paper.
