

Weekly Learning Plan — August 10–13, 2026

Why We Have School — The Story of Learning

SAMPLE PLAN · Generated August 10, 2026 · Concept web approved · Trackers not pulled (sample run) — spiral, vocabulary dedup, and materials inventory unverified

SHEET INDEX — NINE SECTIONS		OVERVIEW · P. 1–2
FAMILY VALUE	Focus Stamina, week 1 of 2 — the value and the theme are the same argument.	
PARTICIPATION	How each child engages, by band — governs every block all week.	
WEEKLY THEME	Why we have school: practice grows the brain; the boys prove it on themselves.	
VOCABULARY	scholar · knowledge · curiosity · perseverance — one per day, Mon–Thu.	
SPECIAL NOTES	Back-to-school context; the Scholar's Tray runs Mon / Wed / Thu.	
MATERIALS	Household and classroom materials only; nothing to acquire.	
SPIRAL LEARNING	New concepts this week plus the tray's built-in internal spiral.	
LEARNING OUTCOMES	Georgia's five required subjects, mapped block by block.	
LOOKING AHEAD	Focus Stamina week 2; candidate themes carried forward.	

FAMILY VALUE — FOCUS STAMINA (WEEK 1: INTRODUCE)

Focus Stamina — staying with hard work longer. Values run two weeks each: this week introduces it, next week extends it. This week the value and the theme are the same argument: brains only grow when we stay with hard things.

PROVISIONAL — previous week's value unverified.

How to teach it this week:

- **Brothers first:** when a brother wants to quit, say “stay with it — your brain is growing right now.”
- **Family:** everyone in this house practices hard things. Name real examples at the huddle.
- **Wider world:** every builder, doctor, and pilot got there by staying with hard work longer (Wednesday's video proves it).

PARTICIPATION — HOW EACH CHILD ENGAGES

Part 1 — Launch Together: Jack and Leo, full academics. Dean, simplified inclusion (counting, pointing, yes/no answers). Max, exposure level (watching, holding, clapping).

Focus and activity blocks (Waves 2–3): Jack and Leo, full academics. Dean, simplified inclusion. Max with Karol.

These defaults govern every block all week. The BY CHILD column on daily pages lists only what a child does differently from them.

WEEKLY THEME — THE BIG IDEA

Learning is how humans grow their power. Every time we practice something hard, our brains physically change. School is the invention humans built so knowledge could pass from person to person instead of dying with the people who discovered it. This week the boys run a real experiment on themselves — the Scholar's Tray memory game, played Monday, Wednesday, and Thursday — and chart the scores to prove the thesis: practice works.

Integration points: Science carries the growing brain; Social Studies carries the story of school and writing; Reading is framed as receiving knowledge across time; Language Arts is preserving it; Math charts the proof; Art builds our own school identity.

VOCABULARY WORDS

- **Monday:** **scholar** — a person who loves to learn and studies hard
- **Tuesday:** **knowledge** — everything you know and understand
- **Wednesday:** **curiosity** — the strong feeling of wanting to find out
- **Thursday:** **perseverance** — continuing to try even when it is hard

Unverified against Vocabulary Tracker — sample run.

SPECIAL NOTES

- **Context for the week:** back-to-school week. The theme answers the question the boys are living: why do we do this every day?
- **The Scholar's Tray** runs three rounds (Mon baseline, Wed, Thu). Keep the same 8 objects all week — the comparison is the experiment.
- **Connection to last week:** N/A — sample run; previous plan not pulled. On a live run the primary spiral appears here.

MATERIALS NEEDED

In Inventory (ASSUMED — inventory not pulled, sample run): serving tray, 8 small household objects, cloth to cover tray, yarn or string, construction paper, crayons and markers, building blocks, clean recyclables, world map or globe, number line, counting bears, Singapore Math materials, glue, scissors, stapler.

Must Acquire: nothing — the week is designed entirely around standard household and classroom materials.

SPIRAL LEARNING

Primary Spiral (from last week): N/A — sample run. On a live run, last week's biggest concept receives one touchpoint per day, Monday through Thursday.

New This Week: the growing brain (practice changes it), school as a human invention, knowledge travels through writing.

Built-in internal spiral: the Scholar's Tray recurs Mon / Wed / Thu with scores charted Thursday in Block 7 — the week proves its own thesis.

LEARNING OUTCOMES — GEORGIA'S FIVE REQUIRED SUBJECTS

SUBJECT	DAILY BLOCK NUMBERS	COVERAGE THIS WEEK
Reading	Block 2	Phonics and decoding daily, framed as unlocking the code adults use to send knowledge. Reading Eggs continues.
Language Arts	Blocks 6 and 10	Sentence mechanics via daily scholar sentences; capitalization and end punctuation; oral reflection and Weekly Meta Thursday.
Math	Blocks 5, 7, and 9	Singapore Math at current level daily; tally charts and a bar graph of tray scores (data literacy); daily math games.
Science	Block 3 (plus Block 8 Wednesday)	The brain and senses; practice and memory; hands-on experiments (memory tray, string telephone, five senses stations); brain hat artifact.
Social Studies	Block 4	History of schools and writing; how knowledge travels; schools around the world with map work.

LOOKING AHEAD

Next week extends Focus Stamina into Week 2 (reinforce and extend) and can spiral the growing brain into any theme — every subject now has a shared answer to "why are we practicing this?" Candidate follow-on themes: How Scientists Know Things, or The Story of Writing.

MONDAY — August 10

The day we discover our brains can grow.

MATERIALS tray, 8 household objects, cloth, score sheet, yarn, counting bears, cups, paper, crayons

VIDEOS SciShow Kids: brain / how-we-learn episode (~4 min) · Jack Hartmann: counting movement song (~3 min) · GoNoodle: movement break (~3 min)

DAY 1 OF 4

10 BLOCKS · EACH 20 MIN · RUN IN ORDER, AT YOUR PACE · BREAK AS NEEDED – AT LEAST ONE PER HOUR OF FOCUSED WORK

OBJECTIVE

Establish that practice physically grows the brain. Tray baseline recorded; neuron chain built.

10

PART 1 — LAUNCH TOGETHER		
THE CORE — WHAT WE DO TOGETHER		BY CHILD — WHO DOES WHAT
1	FAMILY Morning Huddle Run standard Morning Huddle flow (see One-Page Guide). Week-specific additions below: Word of the Day — scholar: a person who loves to learn and studies hard. Instructor says: “A scholar is a person who loves to learn and studies hard. Look around this table — you are looking at scholars.” Spiral Chant — “I am a SCHOLAR.” (Fists on chest, said twice, louder the second time.) Theme Connection — Today we find out what learning actually does to our brains.	DEAN Points to himself and says “scholar” with the group.
	2 LANGUAGE ARTS Phonics Reading Eggs at current lessons. Frame for the week: Instructor says: “Reading is a secret code. When you crack it, people from far away and long ago can send you their knowledge.”	DEAN Letter sound matching with Instructor — point to the letter, make the sound.
	3 SCIENCE x2 The Scholar’s Tray + The Neuron Chain Experiment: The Scholar’s Tray — Round 1 (Baseline) Materials: tray, 8 small household objects, cloth cover, paper for score sheet. Setup: arrange 8 objects on the tray out of sight. Keep the same 8 objects all week. - Show the tray for 30 seconds. Cover it. - Each boy names as many objects as he can remember. Record each score on the score sheet — save it, Thursday needs it. Instructor says: “Your score today is your starting line. Watch what happens to it by Thursday.” The Neuron Chain: boys hold yarn segments in a line — each boy is a brain cell. Pass a squeeze down the chain: that is a message traveling in your brain. Instructor says: “Every time you practice, your brain builds chains like this one — and makes them stronger and faster.” - Discussion: What was easy to remember? What was hard? What could we do to remember more on Wednesday?	DEAN Names 3 objects from the tray with Instructor pointing; joins the chain and passes the squeeze. MAX Holds a yarn segment in the chain, gets a gentle squeeze pass.

4	<u>SOCIAL STUDIES</u> Before There Were Schools • Instructor says: “Long ago there were no schools. How did children learn?” Take answers. • Reveal: families taught children — how to find food, build, stay safe. But when a person died, their knowledge could die with them. • Pose the problem of the week: how could people save what they knew? (Hold the answer — tomorrow delivers it.)	DEAN Answers “who teaches you?” — points to Instructor, Mom, brothers.
----------	--	--

SUGGESTED BREAK – a natural pause point; break whenever your child needs one

PART 2 – DEEP FOCUS

5	<u>MATHEMATICS</u> Singapore Math Singapore Math at current lesson.	DEAN Parallel activity: sorts counting bears by color into cups, counts each cup aloud.
6	<u>LANGUAGE ARTS</u> Writing Mechanics Scholar sentence of the day: “ I am a scholar. ” Capital letter at the start, period at the end. Boys write it and illustrate the margin.	DEAN Traces the first letter of his name.
7	<u>MATHEMATICS</u> Continued — Number Sense Count and record: how many tray objects did each boy remember? Introduce tally marks — one tally per object remembered. This tally sheet becomes Thursday’s bar graph.	DEAN Makes tally marks with Instructor hand-over-hand, counts them aloud.

SUGGESTED BREAK – a natural pause point; break whenever your child needs one

PART 3 – MAKE & REFLECT

8	<u>CREATIVE ARTS</u> Self-Portrait as a Scholar Each boy draws himself as a scholar — himself, doing the thing he most loves to learn. Label with his name. These hang in the schoolroom all week.	DEAN Draws himself with crayons; Instructor labels it “Dean, scholar.”
9	<u>MATHEMATICS</u> Games, Puzzles, Manipulatives Instructor selects. Low-floor, joyful, social math.	
10	<u>LANGUAGE ARTS</u> Oral — Reflection + Close • Daily Closeout questions. • Instructor says: “What does a scholar do when work gets hard?” Target answer: stays with it. • Focus Stamina — Brothers First: each boy names one moment today a brother stayed with something hard.	DEAN Answers one yes/no closeout question.

TUESDAY — August 11

The day we meet the invention that never stops giving.

MATERIALS paper cups, string, sharp pencil (Instructor only), paper, crayons, building blocks, recyclables, linking cubes
VIDEOS StoryBots: letters / how-things-work episode (~4 min) · Jack Hartmann: alphabet movement song (~3 min) · Numberblocks: current number range (~5 min)

DAY 2 OF 4 10 BLOCKS · EACH 20 MIN · RUN IN ORDER, AT YOUR PACE · BREAK AS NEEDED - AT LEAST ONE PER HOUR OF FOCUSED WORK

OBJECTIVE Understand why humans invented writing and schools: so knowledge outlives people.

TRACK 1 2 3 4 5 6 7 8 9 10

PART 1 - LAUNCH TOGETHER

THE CORE - WHAT WE DO TOGETHER BY CHILD - WHO DOES WHAT

1	FAMILY Morning Huddle Run standard Morning Huddle flow (see One-Page Guide). Week-specific additions below: Word of the Day — knowledge: everything you know and understand. Instructor says: "Knowledge is everything you know and understand. Your knowledge grew yesterday. It grows again today." Spiral Chant — "I am a SCHOLAR. I grow my KNOWLEDGE." (Fists on chest, then hands opening upward like a plant growing.) Theme Connection — Callback: yesterday's problem — how did people save what they knew? Today we get the answer.	DEAN Does the growing-hands motion with the chant.
2	LANGUAGE ARTS Phonics Reading Eggs at current lessons. One-line frame: every word you decode is knowledge someone sent you.	DEAN Letter sound matching with Instructor.
3 x2	SCIENCE How Messages Travel — The String Telephone Experiment: The String Telephone Materials: 2 paper cups per pair, string (6-10 feet per pair), sharp pencil (Instructor only). Setup: Instructor pokes a small hole in the bottom of each cup, threads the string through, and knots it inside. - Pairs stretch the string tight. One boy whispers a vocabulary word into his cup; the other holds his cup to his ear and repeats what he heard. Instructor says: "Your voice made the string shake — that shaking is called vibration, and it carried your words across the room." - Test it: what happens when the string is loose? When someone pinches the middle? (The message dies — vibration blocked.) - Connect to the Neuron Chain: messages travel through your brain the same way — along connected pathways. Teach-Back: each boy teaches one thing he knows well to a brother in one minute — knowledge moving from one brain to another, no string required.	DEAN Holds one cup to his ear and repeats the word he hears; whispers his name back down the line.

4	<u>S O C I A L S T U D I E S</u> The Invention of Writing - Deliver the answer to Monday's problem: people invented writing — marks that hold knowledge even after a person is gone. - Show: the first schools taught children to read and write those marks, so knowledge could travel across time. Activity: each boy invents 3 symbols for words he cares about and "writes" a message for a brother to decode.	DEAN Makes marks on paper and tells Instructor what each one means.
----------	--	---

SUGGESTED BREAK – a natural pause point; break whenever your child needs one

PART 2 – DEEP FOCUS

5	<u>M A T H E M A T I C S</u> Singapore Math Singapore Math at current lesson.	DEAN Parallel activity: builds number towers with linking cubes, one tower per number 1-5.
6	<u>L A N G U A G E A R T S</u> Writing Mechanics Scholar sentence of the day: "Knowledge grows." Capital letter, period. Bonus: circle the word that is this week's vocabulary.	DEAN Traces a capital K with finger, then crayon.
7	<u>M A T H E M A T I C S</u> Continued — Manipulatives Extension of Block 5 with manipulatives. Theme touch: count how many symbols each boy invented in Block 4 and compare — who made more, how many more?	DEAN Counts his own symbols aloud, pointing to each.

SUGGESTED BREAK – a natural pause point; break whenever your child needs one

PART 3 – MAKE & REFLECT

8	<u>C R E A T I V E A R T S</u> Build a School Using blocks and recyclables, boys build a school together. Prompt: what rooms does a school need? What would you add that no school has? One build, all brothers — cooperation is the material.	DEAN Adds blocks to the build wherever the brothers direct him.
9	<u>M A T H E M A T I C S</u> Games, Puzzles, Manipulatives Instructor selects. Low-floor, joyful, social math.	
10	<u>L A N G U A G E A R T S</u> Oral — Reflection + Close - Daily Closeout questions. Instructor says: "Who invented school — and why?" Boys retell in their own words. Focus Stamina — Brothers First: name one moment during the build a brother kept working instead of quitting.	DEAN Answers one yes/no closeout question.

WEDNESDAY — August 12

The day knowledge shows us how it travels.

MATERIALS tray + same 8 objects, score sheet, mystery bag items, picture cards, paper strips, crayons, stapler
VIDEOS SciShow Kids: five senses episode (~4 min) · Peekaboo Kidz: brain or senses episode (~5 min) · GoNoodle: movement break (~3 min)

DAY 3 OF 4

10 BLOCKS · EACH 20 MIN · RUN IN ORDER, AT YOUR PACE · BREAK AS NEEDED – AT LEAST ONE PER HOUR OF FOCUSED WORK

OBJECTIVE Trace how knowledge travels into and between brains; see practice already working (tray round 2).

10

PART 1 – LAUNCH TOGETHER	
THE CORE – WHAT WE DO TOGETHER	BY CHILD – WHO DOES WHAT
1 FAMILY Morning Huddle Run standard Morning Huddle flow (see One-Page Guide). Week-specific additions below: Word of the Day — curiosity: the strong feeling of wanting to find out. Instructor says: “Curiosity is the strong feeling of wanting to find out. Curiosity is where every piece of knowledge starts.” Spiral Chant — “I am a SCHOLAR. I grow my KNOWLEDGE. I follow my CURIOSITY.” (Add: hand shading eyes, looking far away.) Theme Connection — Tray check today — did two days of practice change your score?	DEAN Does the looking-far-away motion with the chant.
2 LANGUAGE ARTS Phonics Reading Eggs at current lessons.	DEAN Letter sound matching with Instructor.
3 SCIENCE x2 The Scholar’s Tray — Round 2 + The Five Senses Experiment: Tray Round 2 - Same 8 objects, same 30 seconds, same rules. Record scores next to Monday’s. Instructor says: “Compare your two scores. What changed? Why?” Draw out: your brain has seen the tray before — practice is already working. The Five Senses stations: how does information get INTO the brain? Three quick stations — feel (mystery bag), hear (eyes closed, identify 3 sounds), see (spot 5 green things in 20 seconds). Instructor says: “Your senses are the doors. Your brain is the library. Practice is the librarian that keeps knowledge where you can find it.” - Discussion: which sense did you use on the tray? Which station was hardest? Why?	DEAN Tray: names objects with pointing support. Stations: mystery bag with Instructor naming alongside him.

4 <u>SOCIAL STUDIES</u> How Knowledge Travels - Build the timeline on the floor with picture cards the boys draw quickly: cave walls > clay tablets > scrolls > books > libraries > screens. Instructor says: "Knowledge has been traveling to you for thousands of years. A book is a message from someone you will never meet." - Boys walk the timeline calling out each stop — oldest to newest, then backward.	DEAN Walks the timeline holding Instructor's hand, names "book" and "screen."
---	--

SUGGESTED BREAK – a natural pause point; break whenever your child needs one

PART 2 – DEEP FOCUS

5 <u>MATHEMATICS</u> Singapore Math Singapore Math at current lesson.	DEAN Parallel activity: matches numeral cards 1-5 to dot cards.
6 <u>LANGUAGE ARTS</u> Writing Mechanics Scholar sentence of the day: "I follow my curiosity." Capital letter, period, and today's focus: finger spaces between words.	DEAN Traces a capital C, curves like a curious question.
7 <u>MATHEMATICS</u> Continued — Conceptual Application Compare Monday and Wednesday tray tallies side by side: who improved, by how many? Model the sentence: "___ more than Monday." Comparison language is the math skill; the tray is the data.	DEAN Counts both of his tally rows aloud and says which row is bigger.

SUGGESTED BREAK – a natural pause point; break whenever your child needs one

PART 3 – MAKE & REFLECT

8 <u>CREATIVE ARTS</u> Science Artifact — The Brain Hat Open with two minutes of talk: Instructor says: "How does anyone get really good at anything — soccer, piano, reading? Not magic. Practice. Your tray scores are proving it this week." Artifact: The Brain Hat Materials: construction paper strips, crayons, stapler. - Each boy makes a headband and adds 3-4 paper "neuron chains" (zigzag strips) stapled on top. - On each chain he draws or dictates one thing he practiced this week. Instructor says: "You are wearing your week. Every chain on that hat is a real chain your brain built."	DEAN Makes his headband with pre-cut strips; Instructor staples; he names one thing he practiced.
9 <u>MATHEMATICS</u> Games, Puzzles, Manipulatives Instructor selects. Low-floor, joyful, social math.	

10

LANGUAGE ARTS

Oral — Reflection + Close

- Daily Closeout questions.
- **Instructor says:** “How does knowledge get from a book into your brain?” Accept any chain: eyes > senses > brain.
- **Focus Stamina — Brothers First:** which brother’s tray score grew because he stayed with it?

DEAN

Answers one yes/no closeout question.

THURSDAY — August 13

The day we prove it — and raise our flag.

MATERIALS tray + same 8 objects, score sheet + tallies, world map, stickers, graph paper, crayons, flag fabric or large paper

VIDEOS SciShow Kids: memory / brain episode (~4 min) · StoryBots: how-things-work episode (~4 min) · Jack Hartmann: brain break song (~3 min)

DAY 4 OF 4

10 BLOCKS · EACH 20 MIN · RUN IN ORDER, AT YOUR PACE · BREAK AS NEEDED — AT LEAST ONE PER HOUR OF FOCUSED WORK

OBJECTIVE **Prove the week's thesis with the boys' own data; claim the scholar identity.**

TRACK 1 2 3 4 5 6 7 8 9 10

PART 1 — LAUNCH TOGETHER

THE CORE — WHAT WE DO TOGETHER

BY CHILD — WHO DOES WHAT

1 <u>FAMILY</u> Morning Huddle Run standard Morning Huddle flow (see One-Page Guide). Week-specific additions below: Word of the Day — perseverance: continuing to try even when it is hard. Instructor says: "Perseverance means continuing to try even when it is hard. Scholars persevere — that is the whole secret." Spiral Chant — "I am a SCHOLAR. I grow my KNOWLEDGE. I follow my CURIOSITY. I have PERSEVERANCE." (Add: both fists up, hold strong for three seconds.) Theme Connection — Final tray round today — the week's experiment gets its answer.	DEAN Holds fists up for the full three seconds with the group.
2 <u>LANGUAGE ARTS</u> Phonics Reading Eggs at current lessons.	DEAN Letter sound matching with Instructor.
3 <u>SCIENCE</u> The Scholar's Tray — Final Round + The Verdict - Final round: same 8 objects, same 30 seconds. Record scores next to Monday's and Wednesday's. Instructor says: "Three scores. One brain. What happened between Monday and today?" - Draw the conclusion together: nobody's brain got bigger — it got stronger connections, because of practice. That is what learning IS. Scientist review: boys retell the week's experiment like scientists — what we did, what we measured, what we found. - Plant next week: what ELSE could we test our brains on? Collect ideas.	DEAN Final tray turn with pointing support; celebrates his own count.
4 <u>SOCIAL STUDIES</u> Schools Around the World - On the world map, find Georgia — our school. Then find Japan, Kenya, and Brazil. - One fact per country about how children learn there — different buildings, different languages, same purpose: passing knowledge on. Instructor says: "Millions of scholars are doing what you are doing right now, all over this map."	DEAN Puts a sticker on Georgia and one other country of his choice.

SUGGESTED BREAK — a natural pause point; break whenever your child needs one

PART 2 — DEEP FOCUS

5 <u>M A T H E M A T I C S</u> Singapore Math Singapore Math at current lesson.	DEAN Parallel activity: repeating patterns with counting bears. Instructor lays out red-blue-red-blue and says the colors aloud; Dean adds the next bears to continue it, naming each color. When he can extend that reliably, switch to red-blue-blue-red-blue-blue and repeat the same routine.
6 <u>L A N G U A G E A R T S</u> Writing Mechanics Scholar sentence of the day: "I persevere." Capital letter, period, finger spaces. Then each boy adds one more sentence of his own about the week — invented spelling welcome.	DEAN Dictates his sentence; Instructor writes it under his marks.
7 <u>M A T H E M A T I C S</u> Continued — The Proof Graph The payoff block. Turn the week's tallies into a bar graph — one bar per day per boy, colored in from the tally sheet. Read the graph together: bars grew because practice grew connections. This graph is the week's trophy — hang it next to the scholar portraits.	DEAN Colors his own Monday bar with Instructor counting each square aloud.

SUGGESTED BREAK — a natural pause point; break whenever your child needs one

PART 3 — MAKE & REFLECT

8 <u>C R E A T I V E A R T S</u> Build — Our School Flag Design a flag for our school. Decide together: what colors, what symbol, what one word goes on it? Every boy contributes one element. Hang it over the schoolroom door — this school now has an identity its scholars built.	DEAN Chooses one color and fills in his section of the flag.
9 <u>M A T H E M A T I C S</u> Games, Puzzles, Manipulatives Instructor selects. Low-floor, joyful, social math.	
10 <u>L A N G U A G E A R T S</u> Oral — Weekly Meta + Reflection + Close • Weekly Meta: the four-word chant one last time, then: what is the answer to the week's question — why do we have school? • Daily Closeout questions. • Focus Stamina — Brothers First: each boy tells one brother the hardest thing that brother stayed with this week.	DEAN Says the chant words he knows; answers one yes/no closeout question.

GOVERNANCE — DO NOT PRINT

Sample run — no Notion tracker updates were made. On a live run, all updates below execute only after final approval.

● CONCEPT TRACKER UPDATES (PENDING)

- NEW: The growing brain — practice strengthens connections. Exposures 1/7. Status: Needs Work.
- NEW: School as a human invention. Exposures 1/7. Status: Needs Work.
- NEW: Knowledge travels through writing. Exposures 1/7. Status: Needs Work.
- SPIRAL: N/A — previous week not pulled (sample run).

● VOCABULARY TRACKER UPDATES (PENDING)

- scholar — a person who loves to learn and studies hard
- knowledge — everything you know and understand
- curiosity — the strong feeling of wanting to find out
- perseverance — continuing to try even when it is hard

● VIDEO LOG

Mystery Science removed from the program per Amy (August 10, 2026). No video log entries. Skill file and Notion references require a cleanup pass — standing item.

● WEEK N+1 PREVIEW

Focus Stamina Week 2 (reinforce and extend). Candidate themes: How Scientists Know Things (spiral: the tray becomes a formal experiment) or The Story of Writing (spiral: knowledge travels). Both carry the growing-brain concept to exposure 2.
